

REMOTE WORK TECH CHECKLIST

TEKTOOLS

WFH Tech Checklist: What Are the Most Common/Effective Options?

The initiative of 2021 is definitely remote working. For those of you looking to implement a long-term solution, use the below checklist to ensure the main needs of your team are covered. We are here to help!

Remote Work Tech Checklist - Maximize WFH Success

Bring Your Own Device (BYOD)

Regulated? This is the most important WFH solution. It protects personal devices from threatening networks, corp data.

Cloud / Virtual Desktop

Deliver "work computers" from the cloud. Accessible from any device. If done well, they protect the org and are smoking fast.

Mobile: Device, Plan , MDM

Evaluate your mobile plans and device management for efficiencies, better WFH user experience, features, protection, etc.

Web Conferencing

Online meeting tech is a must. Some are better than others, so choose wisely as it has to work!

Collaboration

Gains have been made in this space from Teams, Slack, etc. Low-cost and effective for WFH.

Phone: VoIP / UCaaS

WFH means less office phone, PBX /use. VoIP/UCaaS enables similar experience when remote

Contact Center Software

Virtual agents post-COVID? Choose CC tech that performs well from employee homes.

Office365 / Google Apps

In the event you have not transitioned to cloud-based office software, now is the time. Easy to use, low-cost, integrated.

Security / Compliance

Remote work adds new requirements for your audit teams if you are HIPAA, PCI, ISO, etc. regulated. Stay compliant.

Cloud Resources

Hardware/Software delivered from the cloud is available on-demand, pay-as-you-go. Respond fast to unexpected change.

TEKEFFICIENT

TekEfficient Has Your Tech Challenges Covered.

Could you use a hand with remote work tech bidding, sourcing, implementation and project management?

MAKE REMOTE WORK EASY, AFFORDABLE AND RELIABLE WITH TEKEFFICIENT
